

Third party **DEVICES**

Impro Technologies also offers a broad range of complementary third party products, which are integrated and fully operable with our pioneering Access Portal range. These units provide additional functionality to our access control systems, ensuring customers have the best of breed solutions.

Morpho

Morpho (Safran) is a global leader in security and identity solutions. The biometric terminals have wide-ranging applications such as population registration, access control, secure payment and many more. The company's proprietary biometric algorithms and sensor technologies, combined with their design and manufacturing expertise, has made them a leader in this market.

The range of products encompasses fingerprint, multimodal vein and print, facial recognition and contactless technologies.

Nedap

Nedap is a market leader in long-range identification. Their patented solutions identify both the vehicle and driver, even at the highest of speeds. This provides a significant improvement in traffic flow in a variety of areas, such as entrances and exits of parking facilities, airports, industrial estates, cities and other challenging environments. The technology also provides secure, comfortable and hands-free access inside buildings.

The Nedap systems are also easy to integrate into existing systems for access control, parking and traffic management.

Nitgen

Nitgen based in South Korea has a variety of advanced biometric authentication solutions for a variety of industries and applications, including mobile keys and cellular integration.

Through relentless efforts in R&D, and responding to the dynamic demands of the biometric security industry, Nitgen is becoming a key player in the industry.
