

Access Portal ENTERPRISE

- **Intelligent:** intuitive, easy to use interface
- **Customisable:** tailor the system to your specific needs
- **Integration:** many options to interface with other systems

10,000 doors | 1,000,000 credential holders

WHO SHOULD USE ACCESS PORTAL ENTERPRISE?

The solution is ideal to meet the global needs of enterprise facilities, such as:

- Educational institutions
- Government and parastatals
- Mining, oil and petroleum
- Heavy industry
- Health care facilities
- Offices and corporate environments

PRODUCT BENEFITS:

- Customisable user interface
- Ongoing software upgrades
- Web-based interface for global availability
- Customisable reports
- One-click threat level actions

Access Portal Enterprise provides you with all the capacity you will ever require and exceptional control in a system that is simple to configure.

The vast feature set makes it one of the most flexible systems available, and everything you need to manage and control your premises is quickly accessible within Access Portal Enterprise.

The web based solution eliminates software deployment to the many client machines. Granular control over user interface components allow easy tailoring of a variety of client templates to suit various roles within the organisation.

The templates can be tied to user accounts or to the enterprise active directory. The class leading depth to which the user interface can be customised adds further options in tailoring the system to suit the needs of the organisation.

The intuitive user interface means that all this power is easily accessible with rapid staff adoption.

Key features include batch operations to allow for easy implementation of large-scale changes to tagholders and devices.

Several integration options allow Access Portal Enterprise to be seamlessly interfaced to other systems and cater for all your enterprise needs.

The dashboard provides the ability to personalise your working area to suit your specific needs - from an IP camera feed, to quick enrol or live transaction feed - you choose how you work best.

The system incorporates a powerful zoning tool for enhanced people movement control.

Access Portal Enterprise is also designed to easily manage multiple sites that may be geographically separate, making up one system.

The software provides a wide array of standard reports with customisable columns and filters. There is also a tool that allows you to generate reports that are tailored specifically to your requirements.
