consultation.**

## Simplicity

Whilst incredibly powerful, the true innovation of Access Portal is its simplicity. We've focussed on creating a user intuitive interface, along with tips and wizards to help along the way, so your site is up and running quickly and easily. But don't let this simplicity deceive you – there's a powerful engine built-in that allows for unrivalled customisation, integration and advanced functionality.

## Technology

Technology is constantly evolving and Access Portal is designed to adapt to future needs – we call it future-proofing. This means you don't have to change your software to use new technologies or products, such as wireless locks, biometrics and more.

## Web interface

We live in a connected world and access control should be no different. Through Access Portal you can connect to your site 24/7 through a secure connection using your smart phone, tablet or PC. Giving you control when you need it.

## Cost effective

Access Portal offers you one of the most powerful pieces of software, at a fraction of the cost of similar systems. Seamless scalability without the traditional rip-and-replace also means your system keeps working for you, long into the future.

## Reliability

As you've come to expect from Impro, once you've got our system in, it simply keeps going. But more than product reliability, is the assurance that you're dealing with a local company you can trust – after all, we've been doing this for over 30 years.

## Bonus!

In case you're still in doubt, remember with Impro Technologies you receive 24-hour technical support, our extensive warranty and a variety of accredited training.

**That's why Access Portal is the answer for all your access control needs.**

# Specifications

## ACCESS PORTAL SOFTWARE
