

# government FACILITIES

keeping the administration and state  
**SECURE**

**Government entities have stringent requirements to protect data, human resources and assets. Through Access Portal, we are able to provide high security solutions that integrate into one single platform.**

## **SOME BENEFITS OF ACCESS PORTAL THAT MAY BE IMPLEMENTED**

- Manages just a few tags to millions, with seamless scalability to expand system
- Biometric technologies encompassing fingerprint, fingervein and facial recognition, with distress detection
- Range of locking devices for servers, cabinets and other storage facilities
- Anti-pass back door locks, to prevent passing a card to another colleague for access
- Integration into CCTV, parking, elevator, building maintenance and fire
- Visitor and guest management, as well as ability to quickly and easily incorporate contractors
- Guard routes to enforce site inspections throughout the facility
- 'Lock down' feature in case of a threat
- Variety of customisable reports, accessible through any web enabled device (smartphone, tablet, computer)
