SEAPORTS

keeping key entry points
SECURE

As one of the most vital economic links for a country, seaport security has to be balanced against the need for fast throughput. Access Portal provides the ideal balance, ensuring improved efficiency without compromising safety and security.

SOME BENEFITS OF ACCESS PORTAL THAT MAY BE IMPLEMENTED

- Seamlessly integrates with perimeter control, electronic surveillance container tracking and CCTV, among others
- Integrated solution to manage vehicle and personnel access control
- Reduce congestion and improve operational efficiency
- Ability to know where all vehicles, containers, personnel are at any given time
- Flexibility to incorporate policy statutes, such as personal safety equipment prior to access

- Scalable solution that effectively expands to meet your business needs
- Extensive audit reports, which can be accessed from any internet enabled device, anywhere in the world
